

Figure 10 is a plot showing the Weighted Average Phase Function (WAPF) for various sizes. The left y-axis represents size (ranging from 840 to 970), and the right y-axis represents the WAPF value (ranging from 10^2 to 10^3). The legend lists the P.F. @ size for each size value. The plot shows multiple curves for each size, with the WAPF generally increasing as size increases.
